

3D ICC provides an integrated solution set of software, services, and subject matter expertise to deploy a Unified Collaboration environment for our customers. Immersive Terf® is the core component of this solution for building virtual locations to enable geographically distributed teams to work together as if they were co-located.

Collaboration is more than just the tools we use. It is more than real-time virtual meetings, and sharing a desktop. It is about working together; it's about synergy, co-presence, and continuity and spontaneity. It embodies all forms of dynamic communication.

IMMERSIVE TERF® DIFFERENTIATORS & COMPETITIVE ADVANTAGE

Immersive Terf® is a 3D immersive environment - a virtual place where real people meet, engage, and create *together* with a true sense of *presence* in a secure, persistent environment.

- **Context** – 3D customizable meeting rooms give you a place for all your drag and drop content from presentations to videos.
- **Co-Presence**
 - Multiple users, multiple activities in the same room at the same time
 - Each person controls their own experience
 - Users can actually see who is in the room with them and what everyone is doing
 - High quality true full-duplex audio for natural conversation flow
- **Continuity** – Always on, always available, provides continuity and spontaneity

Immersive Terf® is one of the most dynamic Unified Collaboration environments on the market!
